

NGUYEN TRONG NHAN

Frontend Engineer

0983054563 • trongnhan.nguyen1104@gmail.com • Ho Chi Minh City

Summary

Frontend Engineer with 5+ years of experience building SaaS applications across web and mobile platforms using React, Next.js, Flutter, and TypeScript. Experienced in designing workflow-driven systems including e-signature, invoicing, HR, AI-powered, and real-time applications. Strong product mindset with hands-on ownership in turning complex business problems into scalable and intuitive user experiences.

Experience

2FSoft

Ho Chi Minh City, Vietnam

Software Engineer

04/2026 - Present

- Developed an AR-powered iOS application using Swift, ARKit, and RealityKit for real-time visualization of indoor plant layouts.
- Designed a modular architecture supporting dynamic composition of 3D assets, containers, and plant models.
- Implemented raycasting, surface detection, and object manipulation workflows to ensure accurate placement and intuitive user interactions.
- Collaborated directly with stakeholders to deliver iterative releases and translate business requirements into production-ready features.

ZAMO

Ho Chi Minh City, Vietnam

Software Engineer

12/2021 - 05/2026

- Built and optimized a Next.js marketing website, improving SEO and reducing page load time by ~30%.
- Developed workflow-driven enterprise applications supporting e-signature, invoicing, taxation, and HR management systems.
- Designed invoice synchronization and classification workflows to improve business process efficiency.
- Built complex PDF e-signature experiences with reusable signing logic, dynamic positioning, and scaling capabilities.
- Integrated WebRTC and Janus Gateway to support real-time video and audio communication.
- Improved AI response latency from ~3s to ~1.7s by implementing chunked audio streaming architecture.
- Collaborated closely with backend and QA teams to deliver reliable production releases.
- Mentored interns engineers, providing code reviews, technical guidance, and support throughout feature development and release cycles.
- Supported deployment and release processes across web and mobile platforms.

CITYNOW COMPANY LIMITED

Ho Chi Minh City, Vietnam

Software Engineer

07/2020 - 11/2021

- Developed and maintained HR management modules using React, Redux, and Ant Design.
- Integrated REST APIs and collaborated with backend engineers to deliver reliable business workflows.
- Improved frontend performance and application stability through debugging, optimization, and code refactoring.
- Contributed to feature planning, implementation, testing, and production releases.

Education

HCM University Of Technology

Ho Chi Minh City, Vietnam

Bachelor's Degree in Software Technology

2017 - 2022

Key Achievements

☆ **Reduced Page Load Time by ~30%**
Optimized a Next.js marketing website through frontend performance improvements and SEO enhancements, resulting in faster page delivery and improved user experience.

💡 **Reduced AI Response Latency by 43%**
Implemented chunked audio streaming architecture, decreasing AI response time from approximately 3 seconds to 1.7 seconds for real-time conversational experiences.

⚡ **Built Real-Time Communication Features**
Integrated WebRTC and Janus Gateway to enable browser-based video and audio communication for AI-powered mock interview sessions.

Skills

Languages: TypeScript • JavaScript • Dart • Swift • Python

Frameworks & Libraries: React • Next.js • Redux • TanStack Query • Flutter • SwiftUI • ARKit • RealityKit

Communication & Integration: WebRTC, REST APIs

Tools: Git • Jira • Confluence • Postman • Figma
